

At school we learn to  
read and write while  
having fun.

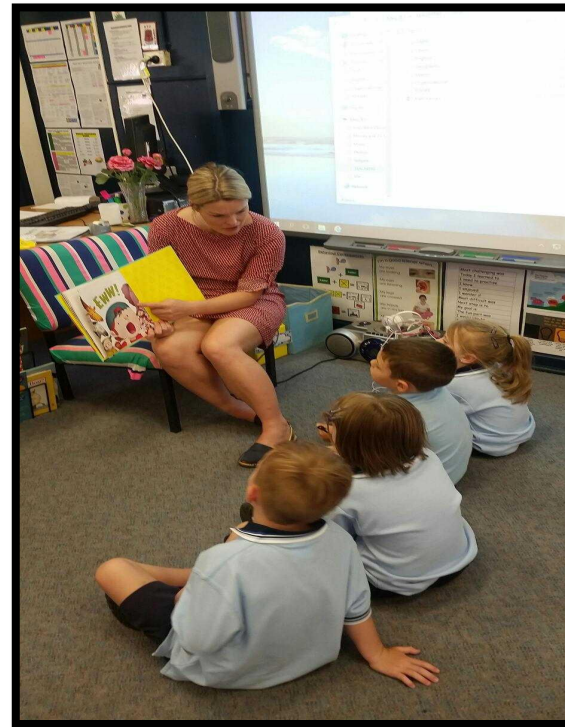

# We listen to stories.

We often do paintings and activities about the story.

We read in the engine room with our teacher.

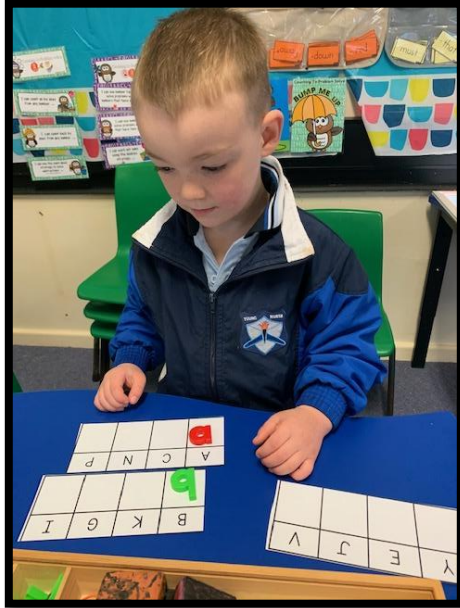

We make words. We also write words that we find in our book.

We learn from literacy games.

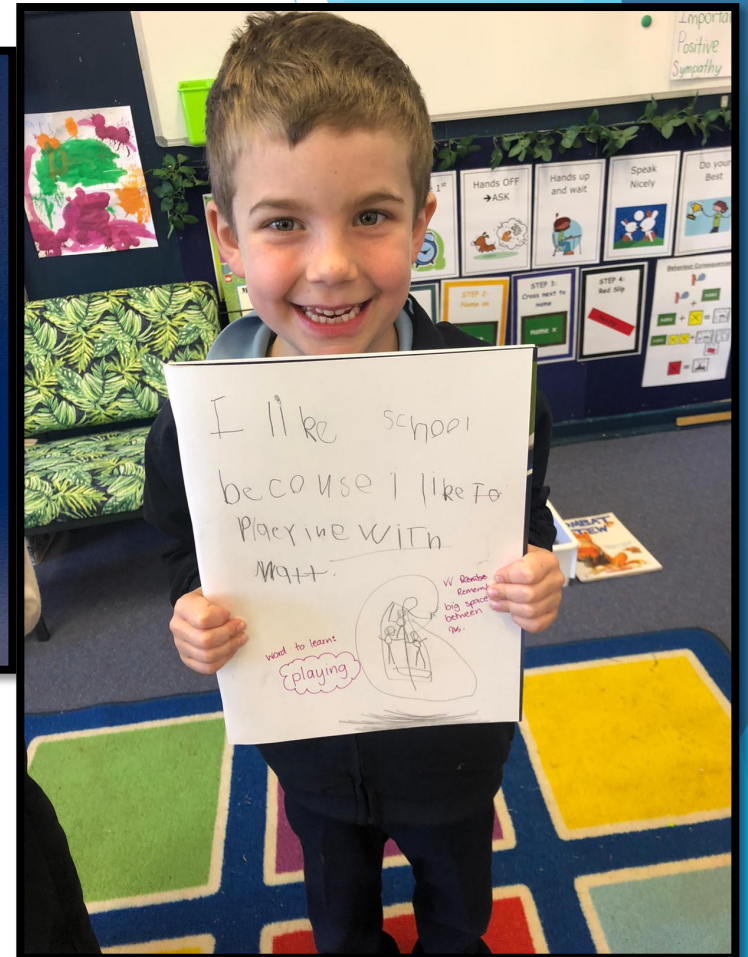

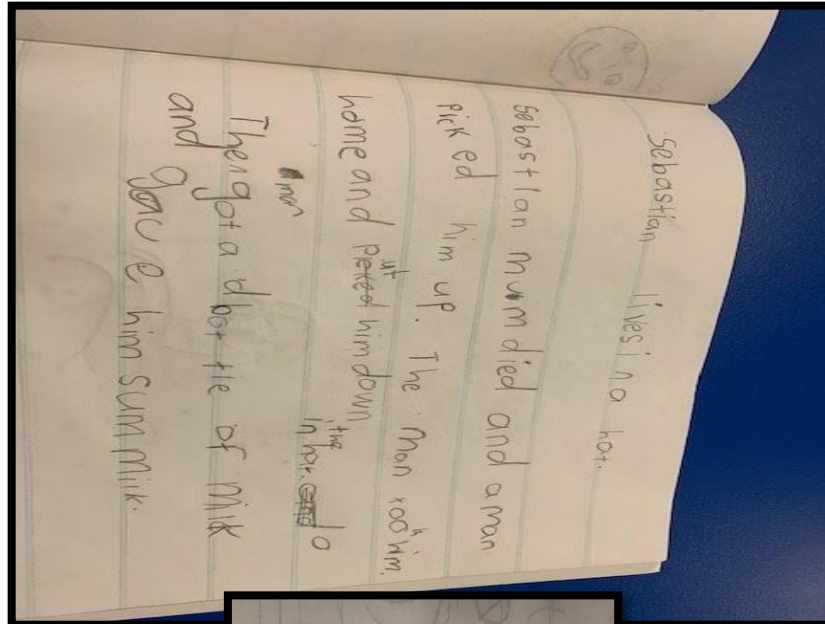

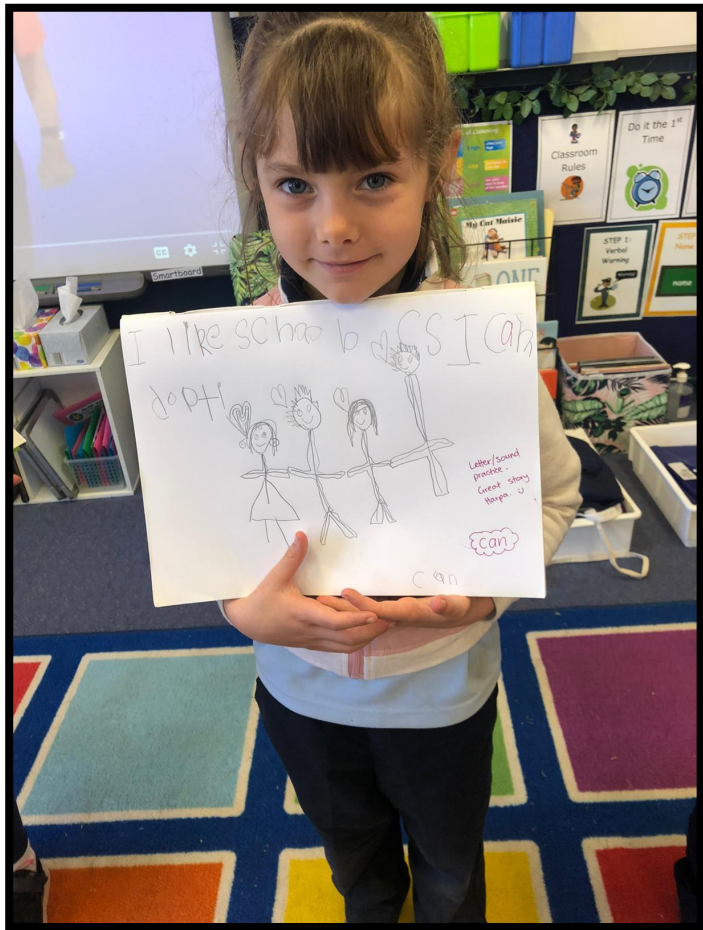

It is fun when we play games to learn our sounds.

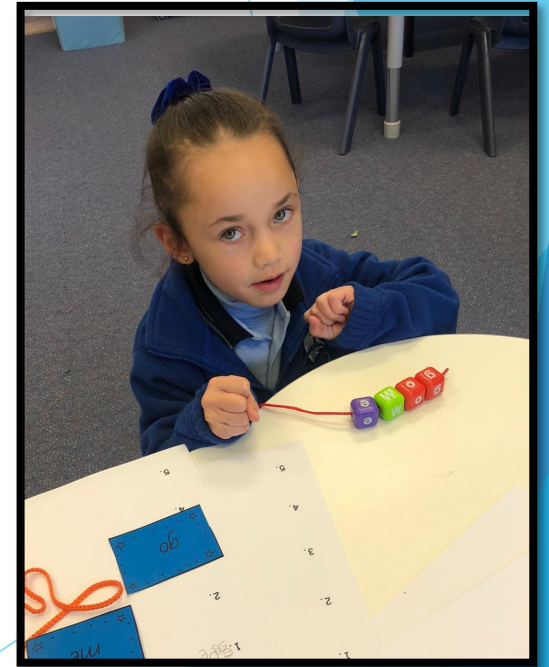

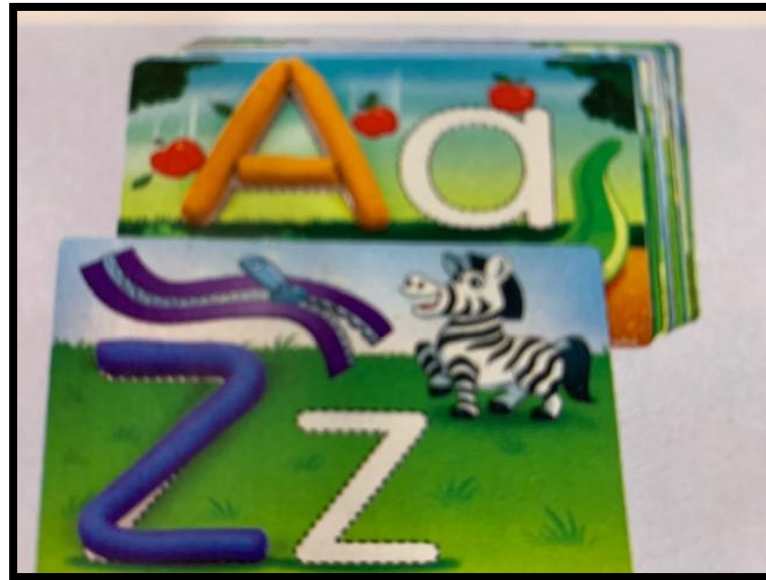

# We write our own stories.

We play games that make our fingers stronger to help us write.

At Young North we are known, valued and cared for, so learning is fun.
